

Christine 12.8T BP STAN TUG 1605 Fowey Harbour Towage

Project Summary

Client:

Fowey Harbour Commissioners

Date:

November 2025 - Spring 2026

Introduction

Fowey Harbour plays a vital role in supporting marine logistics along the south-west coast. Ensuring safe and reliable towage operations is essential for keeping this busy waterway functioning smoothly.

The Challenge

Fowey Harbour required dependable tug support to manage its dynamic marine traffic. The towage environment demands vessels that can respond efficiently to variable weather, shifting schedules and high operational standards.

The Solution

Marine Plant Hire (UK) Ltd deployed Christine - a robust, highly capable vessel known for its versatility in demanding conditions. Christine was assigned to assist Fowey Harbour Commissioners with a range of towage activities throughout November 2025 and ongoing until Spring 2026.

How We Delivered

Through close coordination with the Fowey Harbour team, we ensured operations were delivered safely and on schedule. Christine's proven track record and our experienced crew allowed us to meet the harbour's operational needs with minimal disruption.

Regular communication and flexibility were key, reinforcing our ability to respond effectively to the requirements of a busy port.

The Outcome

The deployment strengthened our partnership with Fowey Harbour Commissioners, who continue to trust us for reliable towage services.

Our collaborative approach ensured safe passage and efficient marine support for all harbour users. The project highlights our continued commitment to service excellence across the UK coastline.
